DETAILED ACTION

Response to Amendment

1. Applicant's response filed February 13, 2002 has been placed of record in the file as Paper No. 8.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites the limitation "said upper operating member" in Line 7. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "an electric part" in Line 3. It is unclear if this electric part is the same as the one recited in Line 1 or a different one.

Claim Rejections - 35 USC § 102

Form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohshima (U.S. Patent No. 5,807,127). With regard to Claim 1, Ohshima discloses socket comprising a socket body (1), a plurality of contact pins (31) disposed on the socket body (1), a rest face (upper face of (1)), a pair of resilient pieces (31c, 31d) having contact portions (31f, tip of (31c)), two slide plates (11,12), and an upper operating member (3). See Figs. 1-6c.

With regard to Claim 2, Ohshima discloses pressing members (3), which are formed between the two slide plates (11,12) and interposed between the pair of resilient pieces (31c, 31d). See Figs. 1-6c.
